Press Release

Fun Fly Bay Drop Kit Module from Old School Model Works

Add this optional accessory kit to your Old School Model Works GHOST to open up your Fun Fly Bay to Drop capabilities. Once assembled, it bolts into the fuselage and gives you the ability to *RESPONSIBLY* drop the included Parachute Action Man, or other things such as candy, and other fun-fly items.

This is a quick kit to assemble, all laser-cut from lite-ply, and be assembled in about an hour using C/A glue. All hardware is included for the door mechanism: hinges, pushrods, clevis, etc. Simply use your own standard sized servo (or smaller), and servo mounting hardware. The adjustable servo mounts allow a wide variety of servo sizes to be used.

Once assembled, the Drop module bolts into the fuselage of our GHOST with two bolts. Then simply plug your servo into a spare channel, adjust the throw and you're ready to go.

Included, is a randomly colored, Parachute Action Man. The really cool thing here is his chute incorporates a tangle-free design, so no wasted time trying to get all the cords straightened out, like in the old days!

Features/Specifications:

- Ready to assemble kit
- 37.5" cubic inch bay capacity": 5" x 2.75" x 2.75"
- Door mechanism is protected (separated) from the bay
- Self contained unit that bolts into the GHOST with two bolts
- Includes installation hardware, hinge material and door mechanism
- Also includes 1 Parachute Action Man with no-tangle parachute
- Plug your servo into a spare channel and it's ready to go
- Requires: a standard-size servo with long servo arm and servo mounting hardware. (not included)

Retail Price: \$17.95
